

## RUDADERM®-junior

REF 091206

### Product Description, Intended use,

#### Application

The plaster stripes consist of a carrier material (1.9 x 7.6cm) which is made of a flexible, air-permeable plastic with colorful animal motifs and is provided with a hypoallergenic adhesive. The non-sticking wound pad (1 x 1.7 cm) is protected all around by the carrier material. The individually sterile packed strips are used to cover primarily healing smaller wounds, injection sites and small punctures (for example vein punctures).

#### Composition

Polyethylene, viscose, polyester, polypropylene, hypoallergenic adhesive

#### Incident reporting

According to MDR (EU) 2017/745, if serious incidents occur in relation to the device, they must be reported to the manufacturer and the competent authority of the Member State in which the user and/or patient is established.

#### Normative and Regulative Requirements, Common Standards

Medical Device according to MDD 93/42/EEC, MDR (EU) 2017/745.

The product does not contain dangerous toxic substances according to REACH.

### Packaging

Primary packaging: Paper packaging  
Secondary packaging: folding box made of cellulose  
Tertiary packaging: Carton made of Cellulose

### Symbols used in labelling

Explanations at [www.nobamed.com](http://www.nobamed.com)

Marking on all packaging levels with CE and according to DIN EN ISO 15223-1- and DIN EN 1041.

#### Storage and Transport

Dry and dustfree.

#### Sterile device

Before using a sterile product, visually inspect the packaging to ensure that it is intact.

#### Single use device

Reusing a single use medical device can lead to microbiological danger. Reprocessing for reuse can decrease the product's performance significantly.

#### Disposal

According to locally applicable legal regulations and standards of infection prophylaxis.
