

**NOBAMED Paul Danz AG**

## PFLEGEKITTEL

**REF 664130**

### **Product Description, Intendend use, Application**

The protection gown, **size XXXL**, is made of nonwoven. Its front and arms are impermeable to liquid, blood, and viruses. The yellow protection gown is open in the back and has knitted, elastic cuffs as well as ribbons for tie-fastening in the waist and at the collar. The cuffs allow for a tight fit of disposable gloves. Due to the breathable material of the backside, the product is comfortable to wear. The yellow colour of the protection gown can be used for the assignment to specific sectors for example when nursing MRSA and VRSA patients. The use of the gown reduces the spread of germs and contaminations during nursing or medical activities. The gown is for single use.

### **Composition**

Polypropylene (SPP), Polyethylene (front and arms)

Cuffs: mixture of polyester and cotton

### **Contraindications**

The product should not be used in the case of a known allergy against the material.

### **Incident reporting**
