

NOBAMED Paul Danz AG

BESUCHERKITTEL (Visitor's Gown)

REF 665720

Product Description, Intended use, Application

The **green** visitor's gown, **size XXL**, is made of spunbonded nonwoven. The long gown is open in the back. It has long sleeves and hydrophilic knitted cuffs at the wrist, with ties at waist and collar. Due to the breathable material, the product is comfortable to wear. The green colour of the gown can be used for the assignment to specific sectors and for the identification "visitors". The use of the gown reduces the spread of germs through contaminated street clothes from the visitor to the patient in particularly sensitive areas (for example intensive care units).

Composition

Polypropylene
Sleeve cuff: polyester

Incident reporting

According to MDR (EU) 2017/745, if serious incidents occur in relation to the device, they must be reported to the manufacturer and the competent authority of the Member State in which the user and/or patient is established.

Normative and Regulative

Requirements, Common Standards

Medical Device according to MDD 93/42/EEC, MDR (EU) 2017/745.

The product does not contain dangerous toxic substances according to REACH.
